

6516208738.txt

I feel that satellite radio should be allowed to continue to provide local broadcast of traffic and weather. Their service is superior to the current AM and FM broadcast reports, and should be allowed on their pay subscription plan.

The detail of information is far more comprehensive in each area that I travel, as they are not constrained by a 3 minute limit, or pushing a commercial into a time slot.

Please support Satellite Radio's traffic and weather local content, and oppose the NAB petition 04-160

Thank you for your consideration
